Subject: RE: PFAS Data Sharing Between EPA and States - Potential Topics

Mike,

Is the following true?

Ex. 5 Deliberative Process (DP)

Tim

Hi Mike,

After a recent discussion, there was some confusion regarding the upcoming PFAS capabilities in SDWIS State.

I put the attached together for my management team – I’m sharing it with you so we have common talking points (please don’t share this document with others).

Thanks,
Michael

Michael Plastino

Hi Michael,

If you recall, I reached to you several weeks ago (or maybe more) about an ECOS PFAS data sharing call. If you scroll down to the last item highlighted, we were hoping you or someone on your team could participate and share info about

data reporting of PFAS analyte codes into SDWIS. The call is 1/22 at 2pm. I'm also going to forward you the scheduler. Please let me know. Thanks.

Mike

Hey Mike,

Just following up to see if you know who will speak for EPA on the places of interest, ambient monitoring, and drinking water testing data pieces. If not, that's fine. But I'll send all speakers (and you all) a draft agenda Monday and wanted to check in before I leave the blanks.

Thanks!

Sarah Grace

Great, I'll get a draft agenda to all of the speakers soon so that we can connect and alter things as needed before the call. Let me know who will speak on behalf of EPA for the various items.

Hi Mike and team,

So we have confirmed three state speakers for the January 22 Caucus call: Betsy Lichti/Dan Newton (whoever is available) from CA Waterboards, John Esch from MI EGLE, and Summer Streets from MPCA in MN. I'm thinking 10-15 minutes for each of them, leaving at least 15 min for EPA (as one presentation or split up into ~5 min presentations on each of these three topics after each state speaker as outlined previously). Let me know what you think and I'll draft up an agenda.

Thanks!

Sarah Grace

Thanks, Mike! I'm reaching out to the state folks now and I'll connect with you as soon as I hear who is available.

Suggested agenda topics for Jan 22nd meeting

Sharing “Places of Interest” data

State example – Michigan – public website showing areas with contamination with drill down (potential POC – Stuart Eddy)

EPA example – “Places of Interest” data model being used in conjunction with National PFAS Data Explorer release

Sharing Ambient Monitoring of PFAS (surface water, soil, sediment, biota) via the Water Quality Exchange

State example – Minnesota (or alternatively Oregon) have send lots of data via the Water Quality Portal

EPA example – We could show some screen captures of what the national data looks like

Sharing of Drinking Water Testing Results

State example (potentially California – my notes, which are a bit dated, are below – perhaps Betsy Lichti could speak)

EPA status on being able to receive DW testing data – I would like to invite the SDWIS manager – either Michael Plastino or Renee Morris to discuss the upgrades that SDWIS is making to allow data flow for PFAS data.
